## VoIP Best Practices

If you join the Webinar using VoIP, please note that audio quality can vary based on your audio software/hardware manufacturer as well as your operating system. When using VoIP, the following best practices are recommended:

- For optimum sound quality, a headset is recommended, preferably a USB headset.
- If a headset is not available, speakers are required to listen to the Webinar and a USB microphone to speak (if the organizer gives you speaking rights).
- If using a microphone, it should be at least 1.5 feet away from any speakers built in or connected to your PC.
- The use of a Webcam microphone is not recommended.
- If you are unmuted by the organizer, you may need to turn the volume down on your speakers to avoid echo.

## To switch audio formats during a Webinar

If the organizer has given attendees a choice in how to join the audio portion of the Webinar, you can switch between using VoIP (Mic & Speakers) or your telephone during the Webinar session.

In the Audio pane, select either *Use Telephone* or *Use Mic & Speakers*. If joining via telephone, be sure to enter the Audio PIN noted in your Control Panel.

**Note:** If you choose to join via VoIP, you will need speakers to listen to the Webinar and a microphone to speak (if the organizer gives you speaking rights).
